

Fred Paul Hain

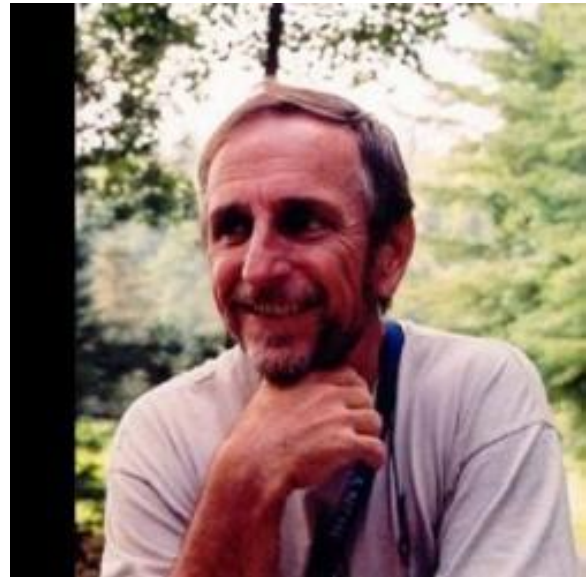

Forest Restoration Alliance (Director)
North Carolina State University (Faculty)
Texas A&M University (Post Doc: Bob Coulson)
Michigan State University (Ph.D.: Bill Wallner and Dean Haynes)
M.S. Duke (M.S.: Roger Anderson)

Research specializations included: Insect-tree interactions, Integrated pest management and Population and Community ecology

Fred created the Forest Restoration Alliance in 2007 to bring back America's forests by addressing the impact of invasive species on eastern hemlock, Fraser fir and other iconic tree species of eastern forests.

Among his many awards, Fred was chosen as the A.D. Hopkins award recipient in 1995 from the Southern Forest Insect Work Conference. The award is presented to an individual with an outstanding record of service to Southern forest entomology.

In 2018, Fred received the North Carolina Governor's Forest Conservationist of the Year Award for his efforts to save our threatened forests.

Two of my favorite pictures of Fred.
