

Photo Salon and Contest at WFIWC 2017

We invite *all photographers* from novice to expert to submit their photos for all to enjoy and compete for the top honors within each category!

The categories are: (1) Forest Insect, (2) Forest Insect Damage, (3) Series (three to seven pictures, where a single picture is not enough to tell the whole story), (4) Entomologists at Work, (5) Humorous (the lighter moments of Forest Entomology), and (6) Other (subjects that do not fit the other categories).

Submissions are limited to digital media. Please submit photos in a large format/file size to Sandy Kegley, skegley@fs.fed.us

Deadline for submission is **Friday, April 21, 2017** to allow for slideshow preparation and judging.

Unless photographers specify otherwise, the winning images will be added to Forestry Images, www.forestryimages.org. Please consider these guidelines as suggested on the Forestry Images website:

- If possible, use at least a 4 megapixel digital camera.
- Images should be taken at the largest size and best quality setting the camera is able to produce.
- Images **MUST** be at least 700 pixels on the longest side to be used.
- Very good quality can be obtained in high-resolution JPEG files.
- We prefer you send the unedited, least compressed jpeg file available.
- JPEG uses a compression scheme that degrades the image each time it is saved. It is important you do everything possible to avoid repeatedly saving the file before submission. If you do edit, crop or enhance the JPEG before submitting, be sure to save the image at the highest quality possible and try to do all edits at one time to avoid repeatedly saving the file.
